TEST SITUATION REPORT No. 1

Generated for the Relais tests · 1 to 7 November 2026

Water and sanitation

Water trucking reached 4,200 people in Site A. Families who left the river banks in October now live in two collective centres.

Families who left the river banks in October now live in two collective centres. Each centre has one latrine block and a single water point.

Each centre has one latrine block and a single water point. Partners count 1,150 households in Site A and 640 in Site B.

Partners count 1,150 households in Site A and 640 in Site B.

Health

Health partners opened a mobile clinic in Site B. The clinic sees about 90 patients a day, most of them children.

The clinic sees about 90 patients a day, most of them children. Vaccination against measles starts next week in both sites.

Vaccination against measles starts next week in both sites. Rains have flooded the access road twice since the start of the month.

Rains have flooded the access road twice since the start of the month. Health partners opened a mobile clinic in Site B.

Table 1: People reached by site (generated figures)

Site	Households	People	Latrines
Site A	1,150	5,600	12
Site B	640	3,100	7
Host families	380	1,900	0
Total	2,170	10,600	19

Next steps

Water trucking will continue until 30 November. After that date, partners will hand the water points over to the committees of both sites, who will run them with the support of the district water office and a small fund for repairs.

Partners will review the needs of the host families at the end of the month.
