Noravia: Situation Report No. 7

Made-up sample report · Covers 1 to 31 October 2026

HIGHLIGHTS

- Floods displaced about 8,000 people in Osmira and Tarvel districts.
- Water trucking and borehole repairs are the first needs named by families.
- The response plan is 38 per cent funded.

Situation overview

Road access to the river crossing remains limited for heavy trucks. The health cluster recorded fewer cases of acute watery diarrhoea than in September. School attendance rose after temporary learning spaces opened in three sites. Prices of staple foods increased in the main market of Noravia town.

Water trucking reached 12,400 people in the northern camps during the reporting period. Partners repaired two hand pumps and one borehole in Osmira district. A joint assessment is planned for the hill villages next week. Nutrition screening found higher rates of acute malnutrition among children under five.

Water and sanitation

Partners repaired the borehole of Osmira camp, which now serves 3,200 people. Partners repaired two hand pumps and one borehole in Osmira district. Road access to the river crossing remains limited for heavy trucks.

Protection teams referred 140 people to specialised services. Water trucking reached 12,400 people in the northern camps during the reporting period. Nutrition screening found higher rates of acute malnutrition among children under five.

Health

Mobile clinics visited eleven villages that had been cut off by the floods. Water trucking reached 12,400 people in the northern camps during the reporting period. Partners repaired two hand pumps and one borehole in Osmira district. School attendance rose after temporary learning spaces opened in three sites.
